SUMMARY

I am a dedicated DevOps Engineer with hands-on experience in building CI/CD pipelines and managing cloud infrastructures. My expertise lies in streamlining processes to enhance system performance and reliability. I thrive in collaborative environments where I can leverage my problem-solving skills to automate workflows and improve deployment efficiency.

EXPERIENCE

DevOps Engineer 01/2020 - Present
Tech Solutions Pvt Ltd Colombo, Sri Lanka

A leading technology solutions provider focusing on cloud and DevOps.

- Designed and implemented CI/CD pipelines which increased deployment efficiency by 30%.
- Managed cloud infrastructure across AWS and Azure platforms, ensuring 99.9% uptime.

Junior DevOps Engineer 01/2019 - 12/2019
Innovatech Solutions Colombo, Sri Lanka

A software development agency specializing in scalable web applications.

- Automated monitoring and alerting systems using Prometheus and Grafana, improving incident response time.
- Collaborated with development teams to streamline the software development lifecycle.

EDUCATION

Bachelor of Science in Computer Science 01/2015 - 12/2019
University of Colombo Colombo, Sri Lanka

LANGUAGES

English Native ●●●●● Sinhala Proficient ●●●●●

STRENGTHS

- ★ **Adaptability**
Ability to quickly adapt to new technologies and processes.
- ⚡ **Team Player**
Strong collaborative skills, working well within cross-functional teams.
- ✍️ **Attention to Detail**
Detail-oriented with a focus on optimizing operational efficiencies.

KEY ACHIEVEMENTS

- ★ **Cloud Migration Project**
Successfully led a project to migrate on-premise services to AWS, reducing operational costs by 25%.
- ♥️ **Performance Optimization Initiative**
Enhanced system performance by implementing automated scaling and monitoring solutions.
