PROJECTS

Banner ERP System Enhancer

An open source project aimed at developing custom plugins to enhance Banner's ERP functionality. GitHub link: github.com/erp-enhancer

Oracle Database Optimiser

Developed scripts to automate database maintenance and optimisation for SMEs. GitHub link: github.com/db-optimiser

KEY ACHIEVEMENTS

Exceeded Project Deadlines

Played a key role in completing projects 30% ahead of time, improving operational efficiency significantly.

Enhanced System Performance

Improved ERP system response times by 25%, benefiting over 1,000 daily users across departments.

Implementation of Change Control

Led a successful initiative to integrate change control procedures, enhancing overall software compliance by 99.9%.

Reduced User-Related Queries

Delivered training that led to a 50% decrease in user-related support queries, boosting staff productivity and resource allocation.

SKILLS

Oracle SQL • PL/SQL • PHP •

JavaScript • HTML • CSS

SUMMARY

Seasoned ERP Software Developer with over 5 years of experience. Proficient in Oracle SQL, PL/SQL, and modern web applications, with a track record of completing projects ahead of schedule by 30%. Thrives on solving complex problems and optimising systems.

EXPERIENCE

ERP Software Developer 06/2021 - Present Capita London, UK

- Developed and implemented new modules for the Banner ERP system that improved system performance by 25%, reducing processing time for critical operations.
- Collaborated with a team of 5 to design and deploy integrations between Banner and external applications, enhancing data consistency across platforms by 40%.
- Led troubleshooting and resolved 98% of technical issues related to Oracle databases, which reduced system downtime and enhanced user satisfaction.
- Improved the efficiency of OLTP tables through advanced SQL optimization strategies, resulting in 30% faster data retrieval processes.
- Conducted workshops for non-technical staff, enhancing their understanding of ERP functionalities, leading to a 50% decrease in user-related queries.
- Implemented change control procedures successfully, maintaining a high rate of software stability at 99.9% compliance with all regulations.

Software Engineer 02/2019 - 05/2021 Fujitsu Birmingham, UK

- Engineered multiple web applications using PHP, JavaScript, HTML, and CSS, resulting in improved customer satisfaction scores by 20%.
- Managed small projects end-to-end, meeting 100% of the project objectives on deadline, including coordination of cross-functional teams.
- Optimised database queries leading to a 15% decrease in server load, streamlining operational costs and enhancing response times.
- Mentored junior developers, facilitating the completion of two major projects 2 weeks ahead of schedule.
- Updated and maintained documentation, which served as a training resource, reducing onboarding time for new team members by approximately 45%.

Junior Developer 08/2016 - 01/2019 Accenture Nottingham, UK

- Assisted in the redesign of legacy systems, leading to a 30% increase in overall efficiency and user satisfaction.
- Played a crucial role in a team of 10 to develop an application support system, resulting in a 50% reduction in resolution times.
- Contributed to the implementation of data mapping strategies, which improved data transformation accuracy by 40%.
- Ensured quality control through rigorous testing, which maintained software integrity and decreased bug-related incidences by about 75%.

EDUCATION

Master of Science in Computer Science 01/2015 - 01/2016 University of Nottingham Nottingham, UK

Bachelor of Science in Information Technology 01/2012 - 01/2015 Manchester Metropolitan University Manchester, UK
